### **COMALLI ELECTRIC**

#### **Providing Electrical Testing and Electrical Maintenance Service Programs**

TEGG Service helps to provide a comprehensive understanding and inventory of your Electrical System. Utilizing our Maintenance Programs, TEGG Service can provide analysis of electrical systems, safety conditions, asset management and component repair or replacement. As well as individual or specific asset testing, TEGG Service Agreements provide reliable programs of Preventative and Predictive Maintenance. TEGG provides the piece of mind knowing that your electrical system, and safety procedures, are up to date. Plan features and a brief description of Testing Services are shown below:
